

1987 □ 10

The coal industry in the first half of 1987

During the first half of 1987, the production of hard coal and coke and imports of hard coal fell during the first half of 1987. Total production of hard coal in the Community, excluding Spain, was 4.6 million t down. (Owing to the inclusion of a further kind of coal, Spain showed an increase which was not comparable with the previous year's figures).

Production in the Community of Twelve (i.e. including Spain) during this period totalled 113.2 million t as against 116.5 million t in 1986. Total pithead stocks rose by 2.1 million t to 35.5 million t at the end of the first half-year.

Over the same period, imports of coal from outside the Community were 2.1 million t lower than in the same period of 1986, at 45.6 million t.

As market conditions continued to be unfavourable, coke production in the Community fell from 29.9 million to 27.3 million t, whilst stocks increased from 7.1 million to 9.5 million t.
